Activities and Sidebars

General Planning Information
SIDEBAR: Choosing a Site Assessment
Notebook ..................................................3

STEP 1
ACTIVITY: Start a property sketch .........................6
SIDEBAR: Are There Unsafe Spots on Your
Property? ................................................... 8

STEP 2
ACTIVITY: Where are the underground lines and
overhead wires? .........................................9
SIDEBAR: Irrigation Systems ............................12

STEP 3
ACTIVITY 1: Patterns of light and shade .................13
ACTIVITY 2: Sun exposure ..................................14

STEP 4
ACTIVITY 1: How cold does it get? ....................... 16
ACTIVITY 2: Microclimates ...............................18
SIDEBAR: What are Frost Dates? ....................... 20

STEP 5
ACTIVITY: Where are my windy spots? ...................23

STEP 6
ACTIVITY 1: Are there spots with
compacted soil? ...........................................26
ACTIVITY 2: Visual observations ..........................27

STEP 7
ACTIVITY 1: Infiltration test ...............................29
ACTIVITY 2: Percolation test ..............................30
ACTIVITY 3: Visual observations
a. Examine subsoil ..................................... 31
b. Topography .......................................... 31
c. Indicator plants ..................................... 32

STEP 8
ACTIVITY 1: What is the physical composition of
my soil?—Soil Sedimentation Test ..................34
ACTIVITY 2: What is the pH—acidity or alkalinity
—of my soil? ......................................... 35
ACTIVITY 3: Visual observations
a. Soil appearance ..................................... 35
b. Soluble salt ......................................... 36
SIDEBAR: Dumping ..........................................37
SIDEBAR: Soil Health ...........................................38

STEP 9
ACTIVITY 1: Measuring steepness of slopes ..........40
ACTIVITY 2: Visual observations on erosion ..........41

STEP 10
ACTIVITY 1: Find out if you have voles .................44
SIDEBAR: What About Moles? .........................45
ACTIVITY 2: Observing for deer damage .................45

STEP 11
ACTIVITY 1: What plants are on the property?—
The Plant Inventory .................................49
ACTIVITY 2: How big are the trees?
  a. Tree height and canopy spread .............53
  b. Measuring tree trunk diameter ..........53
SIDEBAR: Plant Inventory for Densely-Planted
  Areas ..................................................50
SIDEBAR: Tree Growth Rate ............................55

STEP 12
ACTIVITY: Site Assessment Checklist .................59

Taking the Next Steps
SIDEBAR: Landscape and Garden To-Do List ........63
